

TRANSFORMER

WYPM Series (복권)

CE RoHS

단상 복권형으로 입력전압은 AC110/220V 이고 출력측은 중간 Tap 방식이며 Printed - Circuit용 (P.C.B)으로 제작 되었으며 1,2차간 권선분리형 으로 1, 2차 절연이 확보되어 안전성 및 Noise에 영향이 없도록 제작 되었습니다.

This transformer are 110/220v input voltage as single phase isolation transformer and output winding is center tap type. Also, this transformer is operation inserted on printed circuit board (PCB) and safety is very high by galvanic isolation between primary and secondary winding so that there not be effect of noise.
